

I would like to add my support to low power FM stations in my town. Here in Appalachia we have very few opportunities for diverse opinions; most of our television reflects the opinions of a few, and I resent that. I want more access to local broadcast news, low power radio that specifically addresses local issues, and fewer big-businesses owning more media outlets. I want MY voice to be heard, and MY neighbors to be able to have a voice in local issues. Thank you. Carolyn Fisk Ohio
